Profile Summary

Motivated and detail-oriented Data Science enthusiast with a strong foundation in machine learning, data analysis, and statistical techniques. Skilled in Python, SQL, and visualization tools, with the ability to transform raw data into actionable insights. Known for analytical problem-solving, adaptability, and teamwork. Passionate about applying data-driven solutions to real-world challenges and continuously learning new technologies.

Professional Training

Python AI ML with DataScience
Focus Technolab, Thrissur

July 2025 – Feb 2026

Education

Bachelor of Computer Applications (BCA)
Paramakkavu College of Arts & Science, Calicut University

2022 – 2025
CGPA: 8.73

Higher Secondary Education
Gov. Model Boys HSS, Thrissur

2020 – 2022
Percentage: 93%

SSLC
Chaldean Syrian HSS, Thrissur

2019 – 2020
Percentage: 97%

Project

MediAssist – Unified Healthcare Application

- Built a patient-friendly healthcare app integrating machine learning (TF-IDF + RandomForest) for symptom-based disease prediction and CNN models for medical image classification (X-ray, MRI, ECG).
- Delivered dual prediction modes: Symptom-based (Top 3 probable diseases with probability, doctor specialization, and suggested medicines) and Image-based (Covid-19, Pneumonia, Tuberculosis, brain tumors, and cardiac conditions).
- Enhanced accessibility with Gemini API (plain-language medical explanations), speech output (pyttsx3), and YouTube API (curated educational videos).

Technical Skills

Languages : Python, C++, HTML, CSS
Libraries : NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras
Database : MySQL
Tools : Power BI, Excel
Concepts : Machine Learning, Deep Learning (CNN), Data Analysis

Languages

English, Malayalam, Hindi

Soft Skills

Analytical Thinking, Problem Solving, Communication, Team Collaboration
